INFORMATION DISCLOSURE STATEMENT

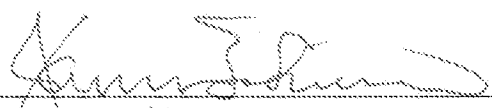

Please consider the references listed on the enclosed PTO-1449 form. Foreign patent documents and non-patent literature are enclosed; cited U.S. patents and patent application publications will be provided on request.

The indication of allowable subject matter is appreciated. In an abundance of caution, Applicants submit these additional references for consideration, to make sure that everything known that may be material to the patentability of any claim is clearly on record before the patent issues. Not all of these references are old enough to be considered §102(b) or (e) art; some are being cited, such as #5 and #8, for example, because claims were advanced during their prosecution that contained terms or features that were similar to those of the allowed claims. Thus, they are brought to the Examiner's attention so that their files may also be reviewed.

This filing is being made with the filing of a Request for Continued Examination. No claim amendments are being submitted, as the allowed claims are believed to be allowable over all of the art now being made of record. No fee is required.

Respectfully submitted,

Date: May 12, 2010
